Import a backup

Opening backup-moodle2-course-2010-c_lantz_demo_course_2-201603...

You have chosen to open:

- ...course-2010-c_lantz_demo_course_2-20160330-0946-nu.mbz
which is: mbz File (5.4 MB)
from: http://moodle.glendale.edu

What should Firefox do with this file?

- Open with
- Save File
- Do this automatically for files like this from now on.

Course backup

Filename	Time	Size	Download	Restore
<input type="button" value="Manage backup files"/>				

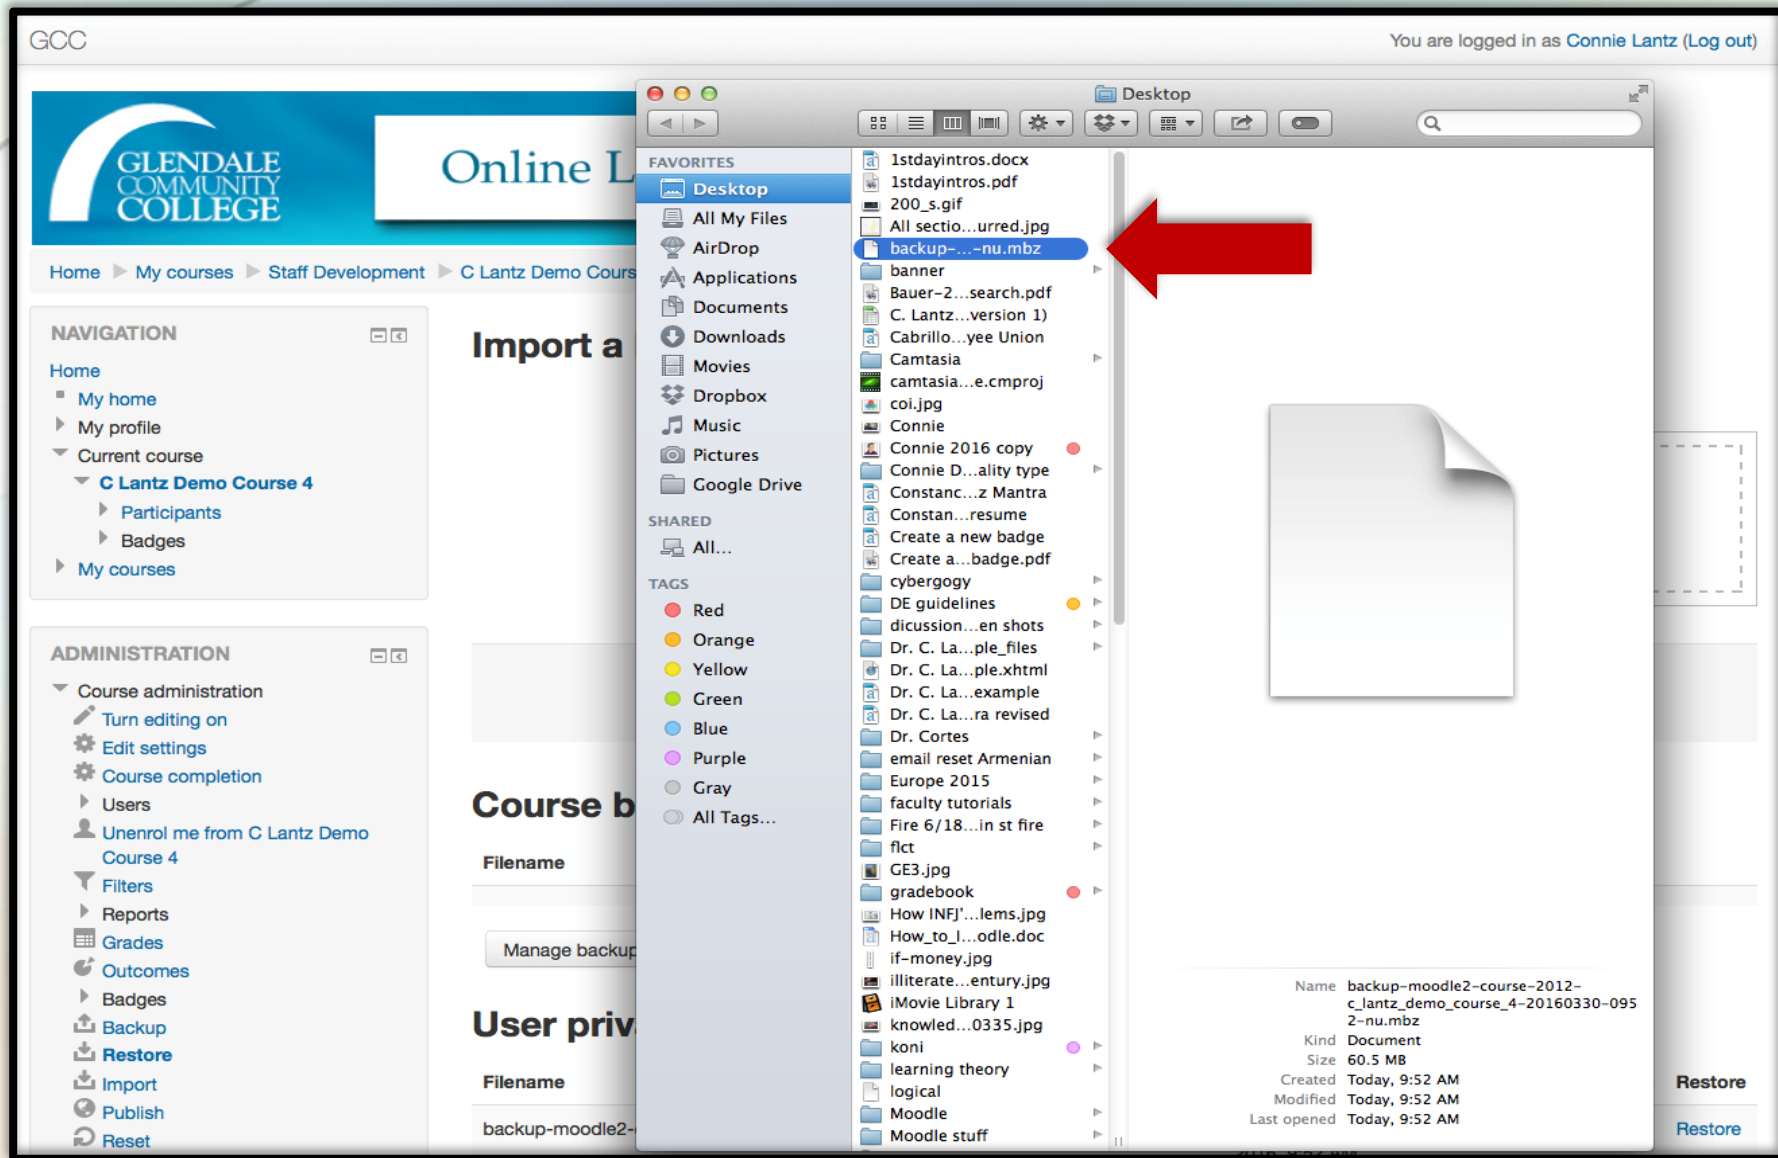

User private backup area

Filename	Time	Size	Download	Restore
backup-moodle2-course-2010-c_lantz_demo_course_2-20160330-0946-nu.mbz	Wednesday, 30 March 2016, 9:47 AM	5.4MB	Download	Restore
backup-moodle2-course-5307-pe_274_lab_-_beg_volleyball_#1588_-	Monday, 29 February	100.4KB	Download	Restore

Click on “Save file” and “OK”. I like to put my backup file on the desktop, but you can save it wherever you like.

The screenshot shows a web browser window displaying the Moodle backup/restore page. The browser's address bar shows the URL `moodle.glendale.edu/backup/restorefile.php`. The page header includes the Glendale Community College logo and the text "Online Learning Resources powered by Moodle". The navigation menu on the left includes "Home", "My courses", "Staff Development", and "C Lantz Demo Course 4". The main content area is titled "Import a backup file" and features a "Files" section with a "Choose a file..." button and a dashed box for file uploads. Below this is a "Restore" button. The "Course backup area" section contains a table with columns for "Filename", "Time", "Size", "Download", and "Restore", and a "Manage backup files" button. The "User private backup area" section also has a table with similar columns. A Firefox download popup is visible in the top right corner, showing a file named "backup-moodle2-course-2..._4-20160330-0952-nu.mbz" (57.7 MB) and a context menu with options: "Remove From History", "Show In Finder", "Go To Download Page", "Copy Download Link", and "Clear List". Red arrows highlight the download icon in the browser toolbar and the "Show In Finder" option in the popup menu.

In this demo, I'm using Mozilla Firefox, so to move my file, I click on the arrow at the top of the page, right click on the popup window that shows the .mbz file, and click on "Show in finder".

When the finder window opens, drag the file onto the desktop.

backup-mo...

The file looks like this on the desktop next to my browser window. It is a .mbz file.

Congratulations! You have successfully backed up a copy of your course materials from Moodle 2.7 (blue/green banner).

Now, let's go into the new Moodle 3.0 (red banner) version on the new server! Until the Friday before summer session, you will get to the new Moodle server by typing "moodle-9.glendale.edu" in your browser URL address field. Once that Friday (June 20th) has passed, the normal "moodle.glendale.edu" and Moodle buttons will open Moodle 3.0.

▼ Description

Course summary

When you are ready, you can unhide your course and change the week dates. To do this, click on “Edit settings” in the Administration block on the right. Click on the “Visible” drop-down window and choose “Show” to unhide the course. Click on the “Course start date” to change the dates in the weekly sections of the course. Choosing the first Monday date for the semester will start all weeks on a Monday.
