GLENDALE COMMUNITY COLLEGE STUDENT EQUITY LEARNING COMMUNITIES

STUDENT EQUITY:

Our mission is to provide equitable educational opportunities and to promote success for every student. We aim to ensure that policies, procedures, and practices are in place that advance the achievement of all students, with an emphasis on eliminating the achievement gaps for traditionally under-represented student groups.

GCC's LEARNING COMMUNITIES

Our learning communities are designed to provide a supportive environment and foster community for students. We offer services to help our students explore their options, reach their potential, and achieve their academic and personal goals. Through their learning community, students make connections with their peers and counselors, make lifelong friends, build critical skills to help navigate college life, stay engaged, and are supported and guided throughout their college journey.

Through the program, students may be eligible for meal cards, TAP cards, parking permits, bookstore funds, and textbook and technology loans. Students are invited to social mixers and events to help build community. Additionally, several university trips are coordinated to help students explore the many transfer opportunities available for them.
